

YOU'RE THE SOLUTION

SAFE USE

Ask your doctor and pharmacist how medications may interact with other meds and alcohol

- Make a list of your current medications to take with you to the doctor and pharmacy
- Tell your doctor and pharmacist how many alcoholic beverages you consume each week
- Prescription pain meds can be habit-forming. Ask your doctor about all the risks involved if you are prescribed these medications

SAFE STORAGE

Store medications out of sight and away from visitors

- Store medications in a cabinet or drawer that visitors can't access without you seeing

SAFE DISPOSAL

Take unused and expired medications to a safe disposal box in your community

- Never flush prescription medications
- Find your closest disposal site below
- Ask your pharmacist about products like *Dispose RX*[™], which help you safely dispose of medication at home
